

United States Cold Storage moves at a brisk pace with **RAYMOND**

United States Cold Storage, a leading provider of refrigerated storage and distribution services to the food industry, serves over 1,000 customers through its nationwide network of refrigerated warehouses. *With over 190 million cubic feet of cold storage space, USCS needed durable, reliable lift trucks from Raymond.* Designed to perform in harsh environments, more than 70 *Raymond*® lift trucks move efficiently in and out of narrow aisles and tall racks in severe temperatures.

For USCS, Raymond delivered a customized package of solutions to keep their trucks and operators running at peak performance. Their fleet is equipped with a cold storage conditioning package to protect the truck's control systems and the Raymond *ThermaKit*™ system to ensure operator comfort and productivity. The result: *efficient handling of more than 1 billion pounds of product per month.*

Lift trucks and business solutions are essential parts of *Raymond CustomCare*™, our total commitment to understanding your business – and delivering a comprehensive package of enterprise solutions and personalized service to help you drive down costs and run your operation smarter.

"Reliability and performance are key to our *Raymond* lift truck purchase decisions."
