

8250 WALKIE PALLET TRUCK

RAYMOND

OPTIMIZE, CONNECT, AUTOMATE.

OPTIMIZE your operations, systems, assets, fleet and personnel to ensure everything in your facility provides the most value. Raymond applies the principles of lean management to help you achieve optimization, eliminate inefficiencies, and identify and solve challenges.

Solutions include Lean Management, Material Handling Equipment, Financing, Rentals, Virtual Reality Learning and Maintenance/Service.

CONNECT your facilities with innovative technologies. Smart technologies, like telematics, help operations gather and analyze data — providing actionable insights that can be implemented to deliver measurable business results.

Solutions include Telematics, Operator Assist Technologies, Labor Management Systems, Real-Time Location Systems, Object Detection Systems and Consulting.

AUTOMATE your operations to make production and distribution processes efficient, easily repeatable, consistent and cost-effective. Automation will enhance processes, maximize existing labor and resources, as well as make your warehouse more scalable.

Solutions include Automated Guided Vehicles, Automated Storage and Retrieval Systems, Robotics and Consulting Services.

POWERED BY LITHIUM. DRIVEN TO PERFORM.

Engineered around a proven and powerful lithium-ion battery, the 8250 Walkie Pallet truck lets you run longer, recharge quicker, and move more pallets—every shift, every day. Intelligently and durably designed, the truck delivers smooth, controlled operation, greater maneuverability, and exceptional reliability.

Long-lasting and fast-charging, the lithium power eliminates the need to buy or store spare batteries for dramatic cost savings. Robust and efficient, the technology reflects Raymond's commitment to alternative energy solutions that can enhance efficiency and productivity in our customers' demanding applications.

SMARTER OPERATION

Designed with smart technology and integrated communication systems, the 8250 Walkie Pallet truck's lithium-ion power pack optimizes your battery use with:

- **ONBOARD BATTERY MANAGEMENT SYSTEM (BMS)**
Reports state of charge and notifies users when a charge is required, and monitors the battery to prevent overcharging and discharging.
- **SLEEP MODE**
Automatically activates when the charge level is low to protect components and conserve energy when the truck is not in use.
- **INTELLIGENT PROTECTION**
Protective features guard against over-discharge: low state-of-charge warning, low state-of-charge mode and low voltage mode.
- **UNIQUE BATTERY DISCHARGE INDICATOR (BDI)**
Shows the battery's real-time state-of-charge and alerts the operator if maintenance is required.
- **LOW STATE-OF-CHARGE ALERT**
Notifies users when the battery pack requires charging with an audible alarm and flashing light.
- **RUN PROTECTION**
Enables charging without unplugging battery pack for added convenience.

WHY LITHIUM-ION

RUN LONGER

Lithium-ion offers increased power capacity allowing fewer work disruptions to charge batteries and does not require battery changeouts.

RECHARGE QUICKER

Lithium-ion offers lower internal resistance, allowing quicker recharging times with a standard 110V outlet for maximum uptime

INCREASE PERFORMANCE

Integrated heaters allow the battery to operate longer in cold temperatures without degrading performance

LOWER MAINTENANCE COSTS

Lithium-ion requires none of the traditional maintenance of lead acid batteries such as watering, equalizing or cleaning

A WORKHORSE OF A TRUCK

+ additional capacity
5,000 lbs (+500 lbs over 8210)

+ enhanced maneuverability
with a 2" shorter head length
that offers a tighter turning
radius in constricted spaces

+ controlled braking
with an Electronic Brake Release,
that when activated in low battery
conditions, overrides the electric brake
and maintains braking ability when the
handle is in the brake position

+ greater strength and durability
with a High Strength Low Alloy (HSLA)
ribbed bumper, ductile iron bell crack and
wheel forks, and polycarbonate covers

+ reliable performance
with stainless steel undercarriage pins, IP66
rated control handles and IP65 electronics
protection; the handle and electronics can
take regular wash downs

+ increased operator confidence
with Click2Creep™ the tiller can be tucked
closely to the tractor for a tighter turning
radius and increased maneuverability

+ increased wear protection
with Lift and Go™ programmability that
enables travel speed to be reduced
until the forks are raised to a specific
height – training operators and preventing
premature wear of the undercarriage

A POWERHOUSE OF A BATTERY

+ greater efficiency
due to low internal resistance generates
less heat and results in less energy loss;
also operates at a higher voltage with
better capacity retention

**+ extreme environment
performance**
integrated heaters and controls
provide thermal management

+ zero maintenance
requires no traditional maintenance
(watering, equalizing or special cleaning)

+ increased productivity
the ability to run longer and charge
faster with a standard 110 outlet

MADE FOR EACH OTHER

A TRUCK AND BATTERY DESIGNED TOGETHER FOR ULTIMATE PERFORMANCE.

PRODUCTIVITY

In addition to offering longer run times and faster recharging, the lithium-ion battery in the 8250 Walkie Pallet truck enhances productivity with:

- OPPORTUNITY CHARGING CAPABILITY
Recharge the truck quickly, easily and conveniently, and have it ready for work whenever you are.
- INTEGRATED HEATERS AND THERMAL CONTROLS
Enjoy longer, undiminished performance in cold storage environments.

EFFICIENCY

Compact yet powerful, the lithium-ion battery helps you do more with less by offering a lower internal resistance and higher constant voltage than lead-acid, resulting in:

- LESS HEAT AND ENERGY LOSS
Battery operates more efficiently with superior capacity retention, better acceptance of regenerative power, and no performance degradation as it discharges.
- LESS MAINTENANCE
Completely sealed battery design eliminates the traditional battery maintenance requirements (watering, equalizing and cleaning) of lead-acid.

MANEUVERABILITY

Compact 5.8” battery compartment gives the 8250 Walkie Pallet truck a 2" reduced head length, allowing the tightest turning radius within the industry for simpler pinwheeling in the back of trucks, secure handling on lift gates, and easier navigation in congested spaces.

LITHIUM-ION vs LEAD ACID

	Li 8250 STANDARD	Li² 8250 OPTIONAL	Pb 8210 LEAD- ACID
AMP HOURS	105	210	Wet Cell: 156 Industrial: 195 Thin Plate: 85,137,170
VOLTAGE	24 (25.6 nominal)	24 (25.6 nominal)	24
kWh	2.69	5.38	Wet Cell: 3.74 Industrial: 4.68 Thin Plate: 2.04, 3.28, 4.08
RUN TIME ON A SINGLE CHARGE (AVERAGE USE)	4-5 hrs.	8-10 hrs.	Wet Cell: 2-3 hrs. Industrial: 5-6 hrs. Thin Plate: 2-3 hrs.
RECHARGING TIME	4 hrs.	8 hrs.	Charge Time: 8 hrs. Cool Down Time: 8 hrs.
REGENERATIVE CHARGE	Yes	Yes	Yes
OPPORTUNITY CHARGING	Yes	Yes	Wet Cell: Not Recommended Industrial: Yes Thin Plate: Yes
PERFORMANCE DROP OFF IN COLD STORAGE	None	Negligible	25-40%
MAINTENANCE REQUIREMENTS	None	None	Watering, equalizing, cleaning
WARRANTY*	5 years or 10,000 hours (whatever occurs first)	5 years or 10,000 hours (whatever occurs first)	Wet Cell: 15-18 months Industrial: 5 years Thin Plate: 3 years

Lithium-ion run time noted was based on a 16 ampere-hour discharge rate while simulating unloading a tractor trailer with 1K-3K loads. Run time will be dependent on customer application and use.

For complete warranty details, refer to applicable warranty documentation. Lead acid to lithium-ion ampere-hour conversion rate: 70%

SPECIFICATIONS

TRUCK

- + Capacity: 5,000 lbs.
- + Power System: AC Traction Control
- + Head Length: 67.2”
- + Frame Width: 28”
- + 5.8” Battery Compartment

CERTIFICATIONS

UL 1642: UL Standard for Safety for Lithium Batteries

UN 38.3: Transportation of Cells and/or Packs Approved

UL 583: UL Standard for Safety for Electric-Battery-Powered Industrial Trucks

UL 2271: UL Standard for Safety for Batteries for Use In Light Electric Vehicle (LEV) Applications

UL E/EE approval rating

YOUR COMPLETE INTRALOGISTICS SOLUTIONS PARTNER

Raymond is your single source for intralogistics innovation—a strategic partner offering end-to-end, data-driven, scalable solutions for the modern warehouse.

Far beyond a forklift manufacturer, we create comprehensive, connected material handling ecosystems designed to help you cut lead times, reduce waste, minimize downtime, and improve quality.

By combining industry expertise and lean management principles with everything from advanced material handling equipment and automation to labor management tools and support services, we can provide tailored solutions that optimize your people, processes, and facilities, and drive your business forward.

RUN BETTER. MANAGE SMARTER.

At Raymond, our aim is to deliver the utmost quality and to work for continuous improvement every day, in every aspect of our business. We are proud of what we build. We are proud of the level of service we provide to keep our customers' business up and running. We take pride in our commitment to our customers through our end-to-end approach in helping them find smarter, more efficient, and more effective solutions.

We value the trust that Raymond has earned through decades of proven performance and hands-on innovation. Since the patenting of the first hand-pallet truck to the invention of the reach truck to our pioneering work in narrow aisle operations and beyond, Raymond has led the way in providing customers with the tools and expertise to improve their business.

IF YOU'RE LOOKING FOR A PARTNER WITH THE TOOLS AND EXPERIENCE TO HELP YOU RUN BETTER AND MANAGE SMARTER, LET'S TALK.
