SOLUTIONS AND SUPPORT CENTERS

GRID DESIGN

Designed to deliver more power for a longer life

- + More positive grid tapered wire “arteries” for better electron flow
- + Purposeful grid design and inset lugs for low-resistance power
- + Optimized corrosion radius for efficiency

STRUCTURAL DESIGN

Built for the real world

- + Tray paint is powder coated for durability
- + Color-coded cabling makes installation accurate and easy
- + Lifting ears are integral to the tray
- + Thermo-bonded cover to jar seal to provide protection against leakage
- + Jar bridge supports the structure and helps prevent shorting

PASTE FORMULA

Ranks as one of the best across the industry

- + High positive paste density and interconnected crystal structure for extreme durability and resistance to failure
- + Robust negative paste thanks to proprietary expander formulation and high paste density

SEPARATORS

For improved performance and maintenance

- + Wavy “S” rib design fixes separator in place for no movement even in heavy vibration applications.
- + Separators mix the electrolyte efficiently, minimize plate exposure, and help prevent shorts
