

4000 SERIES STAND-UP COUNTERBALANCED TRUCKS

(4150/4250)

If you have a dock application that calls for a reliable, cost effective workhorse, or you need a truck that takes you “dock to stock” and back again, Raymond has the stand-up counterbalanced truck that fits.

- + **Versatility:** Dockstance compartment allows operators to travel in either direction without having to switch travel position.
- + **Maintainability:** A truck that requires less maintenance and is built to last longer between intervals, resulting in less downtime.
- + **Productivity:** With quick acceleration and faster travel speeds, operators can get more done in less time—loaded or unloaded.
- + **Visibility:** Our open view mast provides a clear line of sight and the ability to see the forks engaging with loads.

The Raymond stand-up counterbalanced trucks are multi-purpose vehicles designed to work alone or with other systems as part of a total material handling solution.
