

# RAYMOND® 4260 STAND-UP COUNTERBALANCED TRUCK

SMARTER, FASTER,  
FUTURE-READY PERFORMANCE.

The next generation of Raymond Stand-up Counterbalanced Trucks brings together advanced performance, operator-focused design, and integrated intelligence to create a smart, scalable solution that evolves with your business.

Engineered for today's fast-moving operations, the Raymond 4260 delivers exceptional speed, acceleration, and maneuverability with intuitive features that enhance operator comfort, control, and confidence for greater productivity.

## SPECIFICATIONS:

Voltage: 36V

Max Height (TT 3-stage mast): 251"

Capacity: 3,000-5,000 lbs

Max Height (QM 4-stage mast): 270"

Flexible battery options, including maximum-efficiency lithium-ion

### COMFORT & CONTROL

- + Expanded operator compartment with ergonomic padding and extended backrest
- + Adjustable steer tiller and armrest height with intuitive, single-axis control handle
- + ComfortStance™ suspension system for all-day operation with less fatigue
- + Operator Compartment Sensing System (OCSS) (optional)

### PERFORMANCE & UPTIME

- + Industry-leading lift and travel speeds keep pace with high-demand operations
- + Electric power steering delivers energy-efficient, quiet operation
- + Tool-free covers and touchscreen diagnostics simplify maintenance
- + Battery regeneration extends runtime and overall energy performance

### PRECISION HANDLING

- + Performance Stability System™ moderates speed, steering, and tilt inputs for smooth load handling
- + Enhanced featherability delivers precise, stable pallet positioning
- + Sculpted front cover and angled overhead guard enhance visibility from floor to rack
- + Integral sideshift enhances pallet positioning speeds and staging efficiency

# RAYMOND

# DESIGNED FOR TODAY. READY FOR TOMORROW.

## A FOUNDATION FOR THE FUTURE OF CONNECTED WAREHOUSING.

At the heart of the Raymond 4260 is an integrated, connected intelligence that transforms how operators, managers, and trucks work together. The forklift's telematics-ready architecture gives you a scalable platform that combines smart truck functions, operator-assist technologies, and operational insights on a single, central hub.

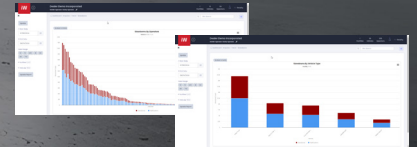

### INTEGRATED iMONITOR DISPLAY

Full-color, 7" display serves as the truck's command center, giving operators clear, real-time information and acting as the interface for connected technologies.

### SMART TECHNOLOGIES FOR GREATER SECURITY AND VISIBILITY

Optional object-detection and location-tracking technologies are designed to enhance operator awareness, minimize impacts, and simplify management of your fleet, personnel, and assets.

### TELEMATICS-READY ARCHITECTURE

iWAREHOUSE® Telematics can be activated at any time, providing truck, operator, and fleet data to support better decisions and continuous improvement.

### OPTIMIZED BATTERY USAGE AND ENERGY COSTS

Energy Asset Manager delivers actionable battery and energy data to help reduce downtime, extend asset life, and better manage total cost of ownership.

## SMARTER BY DESIGN

The Raymond 4260 Stand-up Counterbalanced Truck combines performance, comfort, and connected intelligence, bringing together integrated telematics, operator assist, and advanced technologies features on a single, scalable, reliable platform. A smarter way forward for today's operations and tomorrow's challenges.
