Engineered around a proven and powerful Raymond® built lithium-ion battery, the 8250 Walkie Pallet truck lets you run longer, recharge quicker, and move more pallets—every shift, every day. Intelligently and durably designed, the truck delivers smooth, controlled operation, greater maneuverability, and exceptional reliability.

Long-lasting and fast-charging, the lithium power eliminates the need to buy or store spare batteries for dramatic cost savings. Robust and efficient, the technology reflects Raymond’s commitment to alternative energy solutions that can enhance efficiency and productivity in our customers’ demanding applications.

**WHY LITHIUM**

+ **Run Longer** — Lithium offers increased power capacity allowing fewer work disruptions to charge batteries and does not require battery changeouts

+ **Recharge Quicker** — Lithium offers lower internal resistance, allowing quicker recharging times with a standard 110V outlet for maximum uptime

+ **Increase Performance** — Integrated heaters allow the battery to operate longer in cold temperatures without degrading performance

+ **Smart Technology** — Continuous communication between truck and battery provides real-time information to the operator on battery state-of-charge, as well as truck and lithium pack fault codes

+ **Lower Maintenance Costs** — Lithium battery requires none of the traditional maintenance of lead acid batteries such as watering, equalizing or cleaning

If you’re looking for a partner with the tools and experience to help you run better and manage smarter, contact us today at 1-800-235-7200 or visit us at raymondcorp.com.
• **ONBOARD BATTERY MANAGEMENT SYSTEM (BMS)**
  Allows users to schedule charge times, notifies users when a charge is required, and monitors the battery to prevent overcharging and discharging.

• **UNIQUE HEADS-UP DISPLAY (HUD)**
  Shows the battery’s real-time state-of-charge and alerts the operator if maintenance if required.

• **CAN COMMUNICATION**
  Enables the truck and battery pack to communicate with each other, instantly sharing commands and information for optimum performance.

• **SLEEP MODE**
  Automatically activates when the charge level is low to protect components and conserve energy when the truck is not in use.

• **LOW STATE-OF-CHARGE ALERT**
  Notifies users when the battery pack requires charging with an audible alarm and flashing light.

• **INTELLIGENT PROTECTION**
  Four levels of protective features guard against over-discharge: low state-of-charge warning, reserve power mode, manual travel restriction and dormant mode.

• **RUN PROTECTION**
  Enables charging without unplugging battery pack for added convenience.

---

**SMATER Operation**

Designed with smart technology and integrated communication systems, the 8250 Walkie Pallet truck’s lithium-ion power pack optimizes your battery use with:
**A WORKHORSE OF A TRUCK**

**+ enhanced maneuverability**
with a 2" shorter head length that offers a tighter turning radius in constricted spaces

**+ controlled braking**
with an Electronic Brake Release, that when activated in low battery conditions, overrides the electric brake and maintains braking ability when the handle is in the brake position

**+ greater strength and durability**
with a High Strength Low Alloy (HSLA) ribbed bumper, ductile iron bell crack and wheel forks, and polycarbonate covers

**+ reliable performance**
with stainless steel undercarriage pins and IP65 Protection; electronics can take regular wash downs with sealed components*

**+ increased operator confidence**
with Click2Creep™ the tiller can be tucked closely to the tractor for a tighter turning radius and increased maneuverability

**+ increased wear protection**
with Lift and Go™ programmability that enables travel speed to be reduced until the forks are raised to a specific height – training operators and preventing premature wear of the undercarriage

**A POWERHOUSE OF A BATTERY**

**+ smart technology**
CAN Communication allows continuous data exchange between truck and battery and monitors battery status providing audible and visual indicators if charge is required or low

**+ greater efficiency**
due to low internal resistance generates less heat and results in less energy loss; also operates at a higher voltage with better capacity retention

**+ zero maintenance**
requires no traditional maintenance (watering, equalizing or special cleaning)

**+ extreme environment performance**
integrated heaters and controls provide thermal management

**+ increased productivity**
the ability to run longer and charge faster with a standard 110 outlet

*IP65 rated components protect against: dust ingress and water projected by a nozzle (6.33 mm) against enclosure from any direction.*
MADE FOR EACH OTHER
A TRUCK AND BATTERY DESIGNED TOGETHER FOR ULTIMATE PERFORMANCE.

PRODUCTIVITY
In addition to offering longer run times and faster recharging, the lithium battery in the 8250 Walkie Pallet truck enhances productivity with:

• OPPORTUNITY CHARGING CAPABILITY
  Recharge the truck quickly, easily and conveniently, and have it ready for work whenever you are.

• INTEGRATED HEATERS AND THERMAL CONTROLS
  Enjoy longer, undiminished performance in cold storage environments.

EFFICIENCY
Compact yet powerful, the lithium battery helps you do more with less by offering a lower internal resistance and higher constant voltage than lead-acid, resulting in:

• LESS HEAT AND ENERGY LOSS
  Battery operates more efficiently with superior capacity retention, better acceptance of regenerative power, and no performance degradation as it discharges.

• LESS MAINTENANCE
  Completely sealed battery design eliminates the traditional battery maintenance requirements (watering, equalizing and cleaning) of lead-acid.

MANEUVERABILITY
Compact 5.8” battery compartment gives the 8250 Walkie Pallet truck a 2” reduced head length, allowing the tightest turning radius within the industry for simpler pinwheeling in the back of trucks, secure handling on lift gates, and easier navigation in congested spaces.
**A BATTERY OF TESTS**

To ensure optimal performance under a wide array of operating conditions, the 8250 Walkie Pallet truck and its lithium battery were put through numerous durability and strength tests, including, but not limited to:

- **Bump Track**—Simulated 5-year "abuse" test; 65,000 impacts
- **Drop Test**
  - Full battery pack drop
  - Steel ball test
- **Vibration and Shock**

RUN BETTER.
MANAGE SMARTER.®

At Raymond, our aim is to deliver the utmost quality and to work for continuous improvement every day, in every aspect of our business. We are proud of what we build. We are proud of the level of service we provide to keep our customers’ business up and running. We take pride in our commitment to our customers through our end-to-end approach in helping them find smarter, more efficient, and more effective solutions.

We value the trust that Raymond has earned through decades of proven performance and hands-on innovation. Since the patenting of the first hand-pallet truck to the invention of the reach truck to our pioneering work in narrow aisle operations and beyond, Raymond has led the way in providing customers with the tools and expertise to improve their business.

IF YOU’RE LOOKING FOR A PARTNER WITH THE TOOLS AND EXPERIENCE TO HELP YOU RUN BETTER AND MANAGE SMARTER, LET’S TALK.
