RAYMOND
7310 4-D REACH-FORK TRUCK

VERSATILE. PRODUCTIVE. SPACE SAVER.

With increasing demands on operations, efficient use of storage space and increased productivity are critical. The Raymond 7310 Reach-Fork® truck is designed with four-directional travel capability — called 4-D® — increasing storage space and aiding operators in handling long, bulky loads with less damage.

The 4-D’s articulating load wheels add lateral maneuverability to standard forward and rearward movement – eliminating the need for wide aisles and right-angle turns by allowing operators to travel sideways down narrower aisles with the same wide loads. Aisle widths can be reduced to create up to 40% more storage space.

Designed with our ACR System™, patented open view mast and highly intuitive simultaneous function control handle, operators can place, pick and move big loads more precisely and in less time.

- Applications like home service and lumber stores, steel service centers, plumbing supply, textile industries and manufacturing.
The precision and ease of operation of the 7310 4-D Reach-Fork truck allows denser storage and reduces damage to your inventory, rack and equipment when you need to handle long, bulky loads.

**MANEUVERABILITY AND EFFICIENCY**

Conventional Storage: Using standard counterbalanced lift trucks, aisles must be wide enough to permit right angle maneuvering with long loads.

7310 4-D Reach-Fork truck: Travel sideways down aisles, eliminate right angle turns, and reduce the potential of loads hitting racks, beams and other stock.

**OPERATOR’S DISPLAY**

Informs operator of steering orientation and provides quick switching to 4-D mode for a more productive operation.

**PATENTED, OPEN VIEW MAST**

Gives operator an unobstructed field of vision that allows them to clearly see the baselegs, load and rack for less product damage.
UNIVERSAL STANCE
