

6310 WALKIE STRADDLE STACKER

INCREASE EFFICIENCY AND OPTIMIZE YOUR VERTICAL STORAGE SPACE.

Compact, capable, and cost-efficient, Raymond 6310 Walkie Straddle Stackers allow operators to easily and comfortably handle heavy loads, even in confined spaces.

- + **Versatile, high-capacity performance** simplifies load handling in a range of retail, warehousing, and manufacturing applications.
- + **Ergonomic controls and programmable speeds** allow operators to move more pallets per hour.
- + **Proportional lift/lower controls** enable more precise load handling and reduced rack damage.
- + **Click2Creep**—allowing the truck to be operated with the handle tucked tightly to the tractor—offers even more precise handling.
- + **Modular components and robust construction** simplify maintenance, reduce downtime, and offer a lower total cost of operation.

STANDARD EQUIPMENT

- + 2200, 3000, and 4000lb. maximum capacity
- + Two- and three-stage masts with fork heights up to 189"
- + Load-sensing torsion bar suspension for easier steering
- + AC traction system for smooth, consistent acceleration
- + Dual thumb wheels to control forward and reverse direction and travel speed
- + Programmable performance
- + Handle-mounted proportional lift/lower controls for precise load handling
- + 48" high load backrest
- + Battery discharge indicator with lift interrupt and hour meter
- + Regenerative Braking
- + Emergency Reversing Switch
