

# 6510 WALKIE COUNTERBALANCED STACKER

MOVE LOADS UP TO 4000LBS. MORE  
COMFORTABLY AND CONFIDENTLY.

With a compact design, intuitive ergonomic controls, and high capacities, Raymond's heavy-duty 6510 Walkie Counterbalanced Stackers empower operators to handle large loads more easily, securely, and confidently. Large load wheels and responsive handling make navigating dock plates effortless, ensuring a smoother ride and more efficient operation.

- + **Combined stacker/counterbalanced truck capabilities** simplify block stacking, put-away, dock work, and transportation.
- + **Ergonomic controls and programmable speeds** allow operators to move more pallets per hour.
- + **Proportional lift/lower controls** enable more precise load handling and reduced rack damage.
- + **Modular components and heavy-duty construction** simplify maintenance and offer a lower cost of ownership.

## STANDARD EQUIPMENT

- + 2000, 3000, and 4000lb. maximum capacity
- + Two- and three-stage masts with fork heights up to 189"
- + Load-sensing torsion bar suspension for easier steering
